Introducing B-Compliant

A software package which makes managing your health and safety processes simple.

www.bedrocksolutions.co.nz

B-Compliant Software Package

The Bedrock Solutions B-Compliant software is a health and safety management tool that helps capture and analyse critical information in your workplace.

Every organisation has to deal with health and safety as a part of their day to day business operations. With the myriad of regulatory requirements to comply with, the B-Compliant tool will assist your organisation to manage its health and safety system effectively.

A simple way of managing your health and safety processes.

The Bedrock Solutions B-Compliant tool:

- ▲ generates an audit trail to show compliance against the ACC Workplace Incentive Programme requirements which can lead to reduced ACC employer levies;
- ▲ reduces the administrative requirements to maintain your health and safety system;
- ▲ analyses critical areas of risk (hazards) to your organisation and maintains controls to reduce such risk;
- ▲ tracks critical training requirements specific to each job role;
- ▲ analyses incidents, generates corrective action plans and updates associated hazard controls.

Health and Safety Services

Bedrock Solutions offers a range of services complementary to the B-Compliant software package.

Our services, standalone or combined with B-Compliant, will have a positive impact on your bottom line. Not only will you comply with safety legislation, reducing the risk of prosecution, you will also embed operational systems that promote good work practice.

Bedrock Solutions takes pride in being experts in the field of health and safety.

Bedrock Solutions health and safety services include:

- ▲ warrant of fitness check to identify opportunities for improvement in your health and safety system;
- ▲ development and implementation of health and safety policies, procedures and processes to align with best practice health and safety principles;
- ▲ training in NZQA health and safety unit standards;
- ▲ tailoring workshops to company requirements;
- ▲ preparing companies to meet requirements of ACC Workplace Incentive Programmes;
- ▲ carrying out ACC Workplace Incentive Programme audits.
