Health and Safety Service Model

Our service model aligns to a company's health and safety system to maximise its benefits. We offer three different levels of service:

- ▲ Full Service - for companies who are not actively managing their health and safety system
- ▲ Shared Service - for companies partially managing their health and safety system
- ▲ Self Service - for companies who are relatively self-sufficient in managing their health and safety system

Health and Safety Service Model

How do I decide which service best meets my company needs?

We arrange a time to meet with you and together we determine which service best meets your company needs.

Why bother?

- ▲ Save thousands of dollars through a reduction in your ACC employer levy contribution
- ▲ Maximise efficiency through having experts manage your health and safety system
- ▲ Meet with the requirements of New Zealand legislation reducing the risk of fines and penalties
- ▲ Increase productivity through aligning employer expectations to measurable production outputs

What will it cost?

- ▲ **Service Level:**
Cost is dependent on the service level entered into and the size of your business. For example, a small business with five or less staff:

<u>Service Level</u>	<u>Time Required</u>
Full	1/2 day two monthly
Shared	1/2 day six monthly
Self	1 day each year

Half-day fee is \$425 + GST (plus travel out of Christchurch City boundary)

- ▲ **Health and Safety System**
A 20% discount is offered to companies who purchase a health and safety system as well as enter into a 12 month service agreement with Bedrock Solutions Ltd.
