People

“An empowered organisation is one in which individuals have the knowledge, skill, desire and opportunity to personally succeed in a way that leads to collective organisational success.” (Stephen Covey)

Do you want an edge over your competitors?

At Bedrock Solutions we can help you achieve this edge. No matter what the industry or the size of your business, **training** can have a positive effect on performance and a huge impact on your bottom line.

We all want to improve productivity, quality, customer service and shareholder value at the same time as demonstrating the company's commitment to staff. With professional workplace coaching and counselling, your company may achieve this and a whole lot more! Benefits can include a reduction in absenteeism, increased sense of staff value and affirmation, retaining skill and talent, increased staff motivation and commitment to their work. This is a win-win situation for both you and your staff.

So don't hesitate to contact Bedrock Solutions to help you get the very best out of your people.

“The vision must be followed by the venture. It is not enough to stare up the steps – we must step up the steps.”
(Vance Havne)

Policy

Do you need help in developing company policy?

A policy is an agreed statement that sets out what a company aims to do and the guidelines it will use to carry out its activities. It establishes a unique vision for a company and sets out principles to be followed by those responsible for turning policy into action.

This can seem a daunting task but at Bedrock Solutions we can assist your company in this area. The need for policy development should be kept under constant review. When doing this, you need to consider both the internal and external policies required by your organisation. These policies help your organisation comply with legal responsibilities, demonstrate effective management and accountability, provide clear guidelines and establish clearly your company's beliefs and values.

Contact Bedrock Solutions to help you set up your company's policies and ensure that they are aligned with company processes.

Process

“Luck is what happens when preparation meets opportunity.”
(Seneca)

Do you need to improve your business processes?

In business, you are always looking for initiatives to improve how your company operates. There are two ways to improve your business processes:

- **Effectiveness** - improving the products or services you deliver
- **Efficiency** - eliminating waste through reduced costs, reduced variability and reduced cycle time.

Organisations often focus on efficiency gains and overlook effectiveness. This approach can result in a company having efficient processes with ineffective products or services that at best slows down the process of going out of business.

To avoid this happening to your business, contact Bedrock Solutions so we can help you improve your business processes to maximise effectiveness and efficiency gains.
